

Master's in Speech-Language Pathology

Academic Assessment Plan

1. Students will acquire knowledge in sufficient breadth and depth to function as an effective, well-educated, and competent clinical speech-language pathologist. (IV: A-D)
 - KASA in CALIPSO from courses/clinic (KASA includes projects, tests, quizzes)
 - Including remediation plans
 - Written academic products
2. Students will analyze, assess, and integrate skills to function as an effective, well-educated, and competent clinical speech-language pathologist across the breadth and depth of the scope of practice. (V: A & B)
 - KASA in CALIPSO from courses/clinic (KASA includes simulation, clinical experiences)
 - Including remediation plans
 - Written clinical products (plan of care, etc)
3. Students will design equitable, accessible, and inclusive practices for our increasingly diverse society. (CRLTS & V:F)
 - KASA in CALIPSO from courses/clinic
4. Students will initiate and implement evidence-based practices (EBP). (informational fluency) (IV-F)
 - KASA in CALIPSO from courses (409)/clinic
 - Mastery in Simucase assignments at 90%
 - Complete IF modules (when completed)
5. Students will engage in ethical practices as outlined in the ASHA Code of Ethics. (IV: E and G)
 - KASA in CALIPSO from courses/clinic
6. Students will acquire a minimum of 400 clinical clock hours (V-C)
 - Tracked throughout program on cumulative evaluation in CALIPSO
7. Students will score a passing rate on the Praxis exam. (VI)
 - Obtain and track scores (required for certification)

As an accredited program by the Council on Academic Accreditation (CAA), all assessment processes outlined above are consistent with the standards required for graduate education in CSD program. The measures described (including KASA documentation, clinical competencies, remediation plans, passing of the Praxis exam, and ethical practice) are systematically integrated into the academic curriculum and clinical experiences to ensure compliance with ASHA certification requirements. This alignment confirms that our assessment practices are rigorous, comprehensive, and designed to produce competent, ethical, and evidence-based clinicians who meet the professional standards of the field.
